-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1775

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 11-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Kyocera (JP 05-057507).

The rejection has been maintained and applied to claims 29-30 for reason of record in paper sent 2-2004. Applicant's arguments filed 5-26-04 have been fully considered but they are not persuasive. The applicant argues that the roughness of less than 0.4 does not include 0.2 or less. The examiner disagrees and thus the rejection stands.

3. Claims 11-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Kutscher et al (5,945,207).

The rejection has been maintained and applied to claims 29-30 for reason of record in paper sent 2-2004. Applicant's arguments filed 5-26-04 have been fully considered but they are not persuasive. The applicant argues that the roughness of less than 0.4 does not include 0.2 or less. The examiner disagrees and thus the rejection stands.

Art Unit: 1775

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kyocera or Kutscher et al (as above) in view of Nomura et al (4,966,501).

Kyocera or Kutscher et al discloses the invention substantially as claimed except for the explicit disclosure of the claimed surface roughness. Nomura et al discloses that coatings having the claimed surface roughness improve performance of cutting tools.

Thus it would have been obvious to one of ordinary skill in the art to provide the claimed surface roughness of the coated tools of Kyocera or Kutscher et al, as this smoothness is known to improve performance, as shown by Nomura et al.

The criticality of the length region in the rake and flank side of the exposed alumina layer has not been shown and is considered by the examiner as a design choice.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Archene Turner whose new telephone number is (571) 272-1545. The examiner can normally be reached on Monday through Wednesday, and Friday from 10:30 am. to 6:00 pm.
